# Diamond Drill Locates Ore

Superior & Boston Workers
Hit a Pay Streak on HAS MOLYBOE

At the Superior & Boston the vein

At the Superior & Boston the vein on the six root level, which was abruptly cut off by a mass of diabase, has been relocated through the aid of the diamond drill hole which was started some time ago under the direction of Ed. Sweeney.

Hisek Warrier Tied Up.

At the Black Warrier, which is under lease to Snell & Fisko, operations were temporarily suspended because of the impassable condition of the roads but have been resumed. During the first 15 days of November about 650 tens of ore were shipped from the mine to the El Paso smelter, averaging 6.2 percent copper. Under normal conditions 54 men are employed, the daily output averaging 44 tens.

From Cap Balse Complete.

At the Iron Cap Baise Complete.

At the Iron Cap the raise from the 800 to the 650 level broke through on the night of November 25. The drift on the 650, which is being driven to on the 850, which is being driven to make connection with the old Eureka shaft of the Arizona Commercia, expected to "hole through" at any minute. A drift is to be started immediately on the 800 level to explore the ground at a point directly under the high grade streak which is being worked on the 650 level. The manageworked on the 550 level. The manage-ment feels confident that this streak of high grade will continue through to the eighth level. Shipments are being continued at the normal rate of the carloads monthly to the El Paso

Gibson Leasers Are Busy. At the Gibson operations are confined entirely to the work being carried on by the leasers. About 10 men are working leasers on the property, the majority of whom are securing excellent results. Total shipments averaging 200 tons monthly, are being freighted into Miami by a local firm at the rate of \$2.50 per ton. All ore is being smelled at the Old Dominion. Smelter returns show a coppor tonor ranging from 15 to 25 percent.

Inspiration Mill Progresses.
The American Bridge company is

The American Bridge company I making good progress with the rivet making good progress with the riveting of the cre storage at the Inspiration. On account of insufficient material to start work on the head frames at the main east and west shafts the bridge company has laid off a number of its employes.

Several of the No. 8 gyratory crushers to be shipped by the Allis-Challmers company are now on the road. Everything at the coarse crushing plant is now in readiness for the instalation of the machinery.

stalation of the machinery.

The crushing plant at the Scorpion shaff has been in operation crushing waste, the ore being loaded into cars

shaff has been in operation crushing waste, the ore being loaded into cars and hauled to the concentrator machine shop and warehouses and used for filling in at that place.

Puts Up Tent Houses.

The portable tent houses recently purchased by the inspiration company have been unloaded and are how beling erected in Webster gulch.

The four Hardinge mills are now in place and the motors are being installed. Roller mills and other crushing machinery, together with the flotation machine, are being placed, and shortly the concentrator tables will be set up. It is hoped the mill will be in operation within a short time, although the pipe line from the ranch well has not yet been connected up, nor is there any electric power in sight.

Concrete pouring is now in progress.

In sight.

Concrete pouring is now in progress on the two lower retaining walls for the concentrator, and forms are now being made for the upper retaining The company has ordered 32 ore cars, which will be used for hauling ore between the Scorpion crushing plant and the test mill.

## CONCENTRATOR TO BE BUILT AT ONCE

Hayden, Ariz., Nov. 12.—The Gunn-Thompson interests have decided to erect immediately a 500 ton concentrating plant on their property, the Magna at Superior, Ariz. The Calumet & Arizons Copper company is employing a large force of men in its mines there and with the addition of the Magna mine, things should be on the

## PANAMA OBSERVES INDEPENDENCE DAY

Prosperity Has Followed Overthrow of the Spanish Rule on Nov. 20, 1821.

Nev. 29.—While looking to the opening of the Isthmian canal and anticipating a great increase in her already established prosperity. Panama is observing the 92d anniversary of her independence from Spain. It was the last of the South American colonies to shake off its European rule when on Nov. 29, 1821, it declared independence from Spain. It then became for a time the department of the isthmus of the new republic of Columbia, but its history for many years continued to be one of strife until 1903, when independence from Columbia was effected.

Some of the mile stones in Panama's history, after the Independence from Spain in 1821 are the completion of the Panama railroad in 1855, the start of the construction of the Panama canal in 1851 and treaty with the United States in 1904 through which Panama virtually became a protectorate of the United States.

The shores which were the mecca The shores which were the mecca of pirates until Spain built a costly wall around the capital in 1614 will acon virtually furnish a peaceful calling port for the shipping of the world.

## START CRUSADE ON YELLOW FEVER

Washington, D. C., Nov. 29—Surgeon general Blue of the public health service took active steps today to protect the American guif coast against yellow fever reported by unofficial sources at Puerto, Mexico, the northern terminal of the Tebauntepec rail-

Why.

Five cases and one death are reported and many deaths there are suspected of having been due to lever. The same advices state the British consul at Puerto, Mexico, has been instructed to concentrate all British subjects in that vicinity.

and get well and strong again. It is the best thing I can tell you. Remem-ber also that it is much cooler there at this time. Booklet.

T C. McDERMOTT, Faywood Hot Springs, New Mexico.

Mohave Supply Abundant, · but Separation Proves Difficult.

Kingman, Arie, Nov. 39.—Enough molybdenum lies in Copper canyon, Mohave county, to supply all needs of the United States for many years, according to Frederick W. Horton, of the United States bureau of mines, who has just made a detailed examination.

That the ore is there, was determined beyond a doubt by Horton. The trouble is that it occurs in conjunction with copper and there is no known method of commercially separating the two metals from the gangue. Experi-ments will be made by the bureau to develop some method and if the exeriments are successful the method perments are successful the method will be presented to the owners of the molybdenite claims.

Molybdenum is one of the best steel hardening metals known. It would be widely used in place of tungsten were it not so scarce.

Additional finances have been second of the best steel.

Additional finances have been secured for the completion of betterments required at the Copperville property of the Arizona Southwestern Copper company. In order to insure the tonnage that will soon be required by the big mill, the shaft will be sunk to 500 feet at once. This will also develop more water, which is needed in the mill.

The mine is equipped with one of the best plants in Mohave county. The coliar of the shaft is concrete, the head frame steel, the hoister a 250 horsepower electric double drum and the mill concrete and iron, with the latest things in crushing and concentrating machinery.

The new company that has taken over the Goldonda zinc mine has arranged to begin the sinking of the main shaft from the 495 foot level. It will be put down to 700 feet and levels opened through the new ground.

Qualey Bros. of New Tork, have taken an option on the old C. O. D. mine, 15 miles north of Kingman.

Work is to begin at once.

For the fast year the Qualeys have been operating the Pinkham mine, at Chloride.

been operating the Pinkham mine, at Chloride.

Over \$1,000,000 in lead, silver and gold has been produced by the "C. O. D." which is regarded as being one of the best base metal mines in the country. Owing to the fact that the surface ores have been worked out and there is a heavy flow of water in the lower levels, no leasers have had the property for several years. The owners, however, have sunk a new shaft to a depth of 500 feet. In all the levels and stopes below the water level big ore bodies still exist. level his ore bodies still exist.

Qualey Bros. have arranged to have the shaft on the Hackberry mine, which they also hold under option, such the greater death.

sunk to greater depth.

W. D. Grannis has opened a good showing of lead-silver ore on some claims just east of the "C. O. D." olaims just east of the "C. O. D."

Organizing Mining Company.

D. P. Wright has organized the Black Range Mining company for the purpose of starting work on his group of claims south of Boundary Cone peak. The Wright group is on the Nellis vein, one of the largest quartz outcrops in that district. The orea carry much quartx-adularia and the values run from \$5 to \$155 a ton. Shafts have been sunk to 70 feet, 80 feet and 110 feet.

Good ore is being opened in the "J. F. T." mine, at the head of Bismarck

F. T." mine, at the head of Bismarck canyon. This is one of the largest veins in the country and the values run high in gold, silver and lead.

Captain C. Taylor is preparing to patent the Gold Road Red Top claims, between Little Meadows and Goldroad. He is now doing the necessary work and as soon as he obtains patent will start development. The vain is a continuation of the Gold Road and shows ore of the same general character as the Gold Road mine.

New Gold Producer.

New Gold Producer.

The Iowa mine, in the Oatman district, is a new gold producer. The shaft is down 200 feet and is in excellent ore. Drifts have been run two ways and both have opened ore.

A station has been cut on the 200 foot level of the Lucknow shaft, at Music mountain, and drifts are being run off into the ore body. At this point the ore is more than six feet wide and horns big gold values. More water is coming into the shaft and it is believed that there will soon be enough for milling purposes. Work is to be continued and it is prohable New Gold Producer. is believed that there will soon be enough for milling purposes. Work is to be continued and it is probable that another 100 foot lift will be made. The Cone Mining & Milling company has a hoister on its property west of Boundary Cone and within a week the plant will be ready operation. The shaft, now down 55, will be sunk to death.

depth.

J. F. Vandover has commenced work on his claims in the Cedar district.

## GIVES PRESIDENT DATA ON "TRUSTS"

Washington, D. C., Nov. 39.—Joseph E. Davies, commissioner of corporations, conferred with president Wilson Friday about antitrust legislation, Mr. Davies automitted the results of some of his inquiries and the president is gathering information preparatory to a series of conferences with congressional leaders framing bills.

lt is understood the administration will not seek to concentrate attention on the antitrust reform until the currency bill has been passed in the senate, but there is a possibility that members of the committees may launch their bills before the Christmas holidays.

## China's President Responsible For War With Japan and Emperor's Fall

Frank G. Carpenter

Is aging Rapidly.
Yuan Shih Kal is said to have aged
greatly since he came back to power.
He has always been a high liver. He

short time ago, has been reported as saying that Yuan is sadiy addicted to the opium habit and that he observed that the president was under the in-

fluence of opium during the audience. I do not believe Mr. Bryce said anything of the kind. He is too much of a diplomat to have done so, even though he were sure that the above

were a fact. Yuan Shih Kal is the last of the

really great statesmen of the old regime. The most of the other men who are now doing big things in China are comparatively young. Many of them are graduates of our colleges, and the day is soon coming when

again to the front and had been made viceroy of Shantung. He was a special favorite of the empress dowager and had won her gratitude by his treachery to the young emperor. When the emperor Kwang Su began to introduce foreign civilization in connection with Kang Yu Wei, he took Yuan into his confidence and gave him so many offices that he became known as "Yuan, the reformer." He was allowed to drill and equip modern soldlers and he was really at the head of the best troops really at the head of the best troops

Is Ordered to Kill Downger Empress. In the meantime the old empress lowager, who had nominally retired In the meantime the old empress dowager, who had nominally retired from the government, was dictating to the young emperor how he should do and Kang Wu Wei and the emperor concluded to put her out of the way. Yuan Shih Kai was selected as the tool for this purpose, and while he knelt on his knees before the emperor in the palace, his majesty commanded him to move his army to Theatsin and there kill the viceroy, Yung Lu. After that he was to come on to Pekin and surround the palace and kill the empress dowager. This was a big contract, and Yuan said he would have to have scaled instructions before he would undertake it. These orders the emperor refused to give. Thereupon Yuan Shih Kai apparently consented and left Pekin, the emperor expecting he would do the job.

After considering the matter for 24

After considering the matter for 24 hours. Yuan concluded that the job was too dangerous, and he went to Tientsin and laid the whole plot hefore Yung Lu. Yung Lu took a few soldiers and went on a special train post haste to Pekin. He marched out to the summer palace where the empress dowager was then living, and laid the situation before her. At her orders he then came to Pekin and entered the palace. He captured the emperor and confined him in a building on a little island in the palace grounds. A day later the empress dowager came back. She dethroned the emperor, and from that time until her death she was supreme. When she died the emperor suddenly took sick, and it is supposed that he was poisoned by her orders. Some say he was killed by Tuan Shih Kai for fear of his revenge should he again be on the throno.

In this way Yuan and Tung Lu really saved the empress dowager's life, and it is no woulder that

saved the empress dowager's life, and it is no wonder that she was grateful. It was as a kind of thank offering to ft was as a kind of thank offering to fung Lu that she had his grandson, the ittle Pu Yi, elevated to the throne, and it was not her fault that the boy is not emperor today. She also gave Yuah Shih Kai many high offices and showered him with commissions of one gird or other.

When the Empress Downger Died, I was in China at the time that the impress downger died, and Yuan was then the viceroy of Chihli, and was the greatest man in the empire outside the government. He had introduced modern schools and industrial estab-lishments. He was reorganizing the army and instituting all sorts of re-forms.

After the empress downger's death had much to do with the govern-ent under the haby emperor, until the ment under the baby emperor, until the Manchus and others who were bossing the administration concluded he was getting too powerful, and they sent him into retirement on the ground that his legs were too sere for him to perform his duties. Then the last great revolution came on, and Yuan again aprang to the front. The empire was shattered, and the republic arose.

Rules Vast Number of People.

This, very briefly, is the outline of the career of a republican president who is the ruler of four or five times as many people as Woodrow Wilson.

as many people as Woodrow Wilson. It is only the outline. His whole

brought back with him to found, as I suppose, a museum. He showed me these mummies and also many rare archaeological objects which he had gathered from different parts of the Chinese empire. Some of his finds dated back for a thousand years before Rome was founded, and he had one stone tablet which was written in 1500 R. C. The other day Frederick McCormick, who is connected with the American-Asiatic Archeological society, dropped in upon me fresh from Chinal is spoke of Tuan Fang and asked what had become of him, He replied:

"His enemies have cut him shorter by a head."

Such was the fat of a man who in many respects was like Gladstone, and who was as much of a patriot as was Jefferson or Washington.

Li Hung Chang National Herald. I am told that Li Hung Chang's name grows greater in China as the years go on. A memorial tablet has been put up for him in Pekin, and temples have been exected in his honor in the many citles where he ruled as an official in the control of the character of the cha
